

Child and Adolescent Development

Table of Contents

CHAPTER 1: Basic Concepts of Child and Adolescent

Development (Dap Louw & Robert Kail)

- 1.1 Orientation
- 1.2 Views on children: an historical overview
- 1.3 Developmental stages and domains of development
- 1.4 Developmental issues
 - 1.4.1 Nature or Nurture?
 - 1.4.2 Continuity or discontinuity?
 - 1.4.3 Passive or active involvement?
 - 1.4.4 Universality or cultural context?
- 1.5 Theories of development
 - 1.5.1 The biological perspective
 - 1.5.2 The psychodynamic perspective
 - 1.5.3 The learning theory perspective
 - 1.5.4 The cognitive-developmental perspective
 - 1.5.5 The contextual perspective
 - 1.5.6 The big picture
- 1.6 Research in child development
 - 1.6.1 Kinds of research
 - 1.6.2 Methods of gathering information
 - 1.6.3 General research designs
 - 1.6.4 Research designs for studying human development
 - 1.6.5 Cross-cultural research
 - 1.6.6 Research ethics

SUMMARY

CHAPTER 3: The Neonatal Phase and Infancy

(Dap Louw & Anet Louw)

- 3.1 The Neonatal Phase
 - 3.1.1 The physical appearance of the newborn
 - 3.1.2 Assessment of the newborn
 - 3.1.3 Adjustment to basic life processes
 - 3.1.4 Perception
 - 3.1.5 Sleep and dreaming
 - 3.1.6 Feeding
 - 3.1.7 Neonatal learning
 - 3.1.8 Individual differences
- 3.2 Infancy
 - 3.2.1 Physical development
 - 3.2.1.1 General physical development
 - 3.2.1.2 Motor development
 - 3.2.1.3 Perceptual development
 - 3.2.2 Cognitive development
 - 3.2.2.1 Piaget's view of the first two years: sensorimotor development
 - 3.2.2.2 Learning
 - 3.2.2.3 Memory
 - 3.2.2.4 Language development
 - 3.2.3 Personality development
 - 3.2.3.1 Defining personality
 - 3.2.3.2 Personality development during infancy
 - 3.2.4 Social development
 - 3.2.4.1 Attachment
 - 3.2.4.2 Socialisation
 - 3.2.4.3 Peer relations

SUMMARY

CHAPTER 2: Prenatal Development and the Birth Process

(Dap Louw)

- 2.1 The prenatal period
 - 2.1.1 The beginnings of a new life
 - 2.1.1.1 Conception
 - 2.1.1.2 Chromosomes, genes, DNA and RNA
 - 2.1.1.3 The Human Genome Project
 - 2.1.1.4 Cell division and crossover
 - 2.1.1.5 Dominance and recessivity
 - 2.1.1.6 Sex determination, sex-linked characteristics and polygenic inheritance
 - 2.1.1.7 Multiple births
 - 2.1.1.8 Cloning
 - 2.1.1.9 Genetic abnormalities
 - 2.2 The prenatal stages
 - 2.2.1 The germinal stage
 - 2.2.2 The embryonic stage
 - 2.2.3 The fetal stage
 - 2.3 Prenatal environmental influences
 - 2.3.1 The age of parents
 - 2.3.2 Nutrition of the mother
 - 2.3.3 Radiation
 - 2.3.4 Diseases in the pregnant woman
 - 2.3.5 The use of medication and drugs
 - 2.3.6 The emotional state of the mother
 - 2.4 The birth process
 - 2.4.1 Childbirth complications

SUMMARY

CHAPTER 4: Early Childhood

(Anet Louw & Dap Louw)

- 4.1 Physical development
 - 4.1.1 General physical development
 - 4.1.2 Influences on physical development
 - 4.1.2.1 Heredity and hormones
 - 4.1.2.2 Nutrition
 - 4.1.2.3 Emotional well-being
 - 4.2 Cognitive development
 - 4.2.1 Theories of cognitive development
 - 4.2.1.1 Piaget's theory: the preoperational stage
 - 4.2.1.2 Neo-Piagetians
 - 4.2.1.3 The child as theorist
 - 4.2.1.4 Vygotsky's sociocultural theory
 - 4.2.1.5 Information-processing theory
 - 4.2.2 Language development
 - 4.2.2.1 Characteristics of the language of preschoolers
 - 4.2.2.2 Factors influencing the language acquisition of preschoolers
 - 4.3 Personality development
 - 4.3.1 Theories of personality development
 - 4.3.2 Emotions
 - 4.3.2.1 Understanding emotions
 - 4.3.2.2 Emotional expression: Basic emotions
 - 4.3.2.3 Emotional expression: Involving the self
 - 4.3.2.4 Emotional expression: Involving others
 - 4.3.2.5 Emotion regulation
 - 4.3.3 The self-concept
 - 4.3.3.1 The development of the self-concept
 - 4.3.3.2 Self-esteem
 - 4.3.4 Gender
 - 4.3.4.1 Gender-role development

- 4.3.4.2 Theories of gender-role development
- 4.4 Social development
 - 4.4.1 Family relationships
 - 4.4.1.1 Parents or caregivers
 - 4.4.1.2 Sibling relationships
 - 4.4.2 Peer relationships
 - 4.4.2.1 Play
 - 4.4.2.2 Aggressive behaviour
 - 4.4.2.3 Pro-social behaviour
 - 4.4.3 Moral development
- SUMMARY

CHAPTER 5: Middle Childhood

(Anet Louw & Dap Louw)

- 5.1 Physical development
 - 5.1.1 General physical development
 - 5.1.2 Motor skills
- 5.2 Cognitive development
 - 5.2.1 Piaget's theory: Concrete operational stage
 - 5.2.2 Development of information-processing skills
 - 5.2.3 Language development
 - 5.2.4 Academic achievement
 - 5.2.4.1 School readiness
 - 5.2.4.2 Achievement motivation and learning orientation
 - 5.2.4.3 Parent contributions
 - 5.2.4.4 Socio-economic status
 - 5.2.4.5 School contributions
 - 5.2.4.6 Electronic media
 - 5.2.5 Dimensions of cognitive functioning
 - 5.2.5.1 Mental retardation
 - 5.2.5.2 Learning disabilities
 - 5.2.5.3 Attention-deficit/hyperactivity disorder
 - 5.2.5.4 Giftedness
 - 5.2.5.5 Creativity
 - 5.2.5.6 Educating special needs children
- 5.3 Personality development
 - 5.3.1 Theories of personality development
 - 5.3.2 Self-understanding: The development of self-concept and self-esteem
 - 5.3.3 Emotional development
- 5.4 Social development
 - 5.4.1 The role of the family
 - 5.4.1.1 Parent-child relationship
 - 5.4.1.2 Models of influence in the family
 - 5.4.1.3 Parents' role in children's social development
 - 5.4.1.4 Discipline
 - 5.4.1.5 Sibling relationships and only children
 - 5.4.2 Peer relationships
 - 5.4.2.1 Nature and function of the peer group
 - 5.4.2.2 Friendships
 - 5.4.2.3 Play in middle childhood
 - 5.4.2.4 Peer acceptance
 - 5.4.2.5 Peer victimisation
 - 5.4.2.6 Media influence
 - 5.4.3 Moral development
 - 5.4.3.1 Moral emotions
 - 5.4.3.2 Moral behaviour
 - 5.4.3.3 Moral reasoning
 - 5.4.3.4 Promoting morally competent behaviour in children
- SUMMARY

CHAPTER 6: Adolescence

(Anet Louw, Dap Louw & Ilse Ferns)

- 6.1 What is adolescence?
 - 6.1.1 Demarcating adolescence
 - 6.1.2 A stormy phase?
- 6.2 Physical development
 - 6.2.1 Adolescent growth spurt
 - 6.2.2 Sexual maturation
 - 6.2.2.1 Sexual maturation in girls
 - 6.2.2.2 Sexual maturation in boys
 - 6.2.3 The psychological effects of physical changes
 - 6.2.4 Adolescent sexuality
 - 6.2.4.1 Changing values and adolescent sexuality
 - 6.2.4.2 Adolescent sexual behaviour
 - 6.2.4.3 Teenage pregnancies
 - 6.2.4.4 Homosexuality and adolescence
- 6.3 Cognitive development
 - 6.3.1 Piaget's theory
 - 6.3.2 The information-processing view of adolescent cognitive development
 - 6.3.3 Practical cognition: the effects of adolescents' cognitive abilities on certain areas of their development
 - 6.3.3.1 Argumentativeness, idealism and criticism
 - 6.3.3.2 Social cognition
 - 6.3.3.3 Self-consciousness and self-focusing
 - 6.3.3.4 Planning and decision making
- 6.4 Personality development
 - 6.4.1 Theories of personality development
 - 6.4.1.1 Erikson's theory: Identity versus identity confusion
 - 6.4.1.2 James Marcia's theory: The formulation of identity statuses
 - 6.4.2 Self-conceptions: Adolescents' understanding of self
 - 6.4.3 Emotions
 - 6.4.4 Career choice
 - 6.4.4.1 Theoretical perspectives on career choice
- 6.5 Social development
 - 6.5.1 The parent-adolescent relationship
 - 6.5.1.1 Parent-adolescent conflict
 - 6.5.1.2 Autonomy and attachment
 - 6.5.1.3 Parenting styles
 - 6.5.2 Peer-group relationships
 - 6.5.2.1 The structure of the peer group
 - 6.5.2.2 Conformity
 - 6.5.2.3 Friendships
 - 6.5.2.4 Romantic relationships
 - 6.5.2.5 Adolescents and cyberspace
 - 6.5.3 Moral development
 - 6.5.3.1 Theories regarding the moral development of adolescents
 - 6.5.3.2 Factors influencing moral development during adolescence
- SUMMARY

CHAPTER 7: Vulnerabilities, Resilience and Rights of Children

(Dap Louw, Norman Duncan, Linda Richter & Anet Louw)

7.1 Vulnerabilities

7.1.1 Family influences

7.1.2 Maltreatment

7.1.3 Poverty

7.1.4 Substance abuse

7.1.5 AIDS

7.1.6 Suicide

7.1.7 Violence

7.1.8 Death and bereavement

7.2 Children's reaction to trauma

7.3 Resilience

7.4 The rights of the child

Summary
